ABOUT DK FIBRE GLASS

DK Fibreglass works are a family run ISO 9001:2015 certified manufacturing company specialising in the production of GRP/ FRP components for over 3 decades.

As with many established companies DK Fibreglass's story starts with humble beginning's established in 1985 by our founder Ken Regini starting out in a single garage producing small one of parts whilst working on his first ever crazy golf course design that are now known around the world, it was in fact the successful sale of this first course to Warner Leisure Hayling Island that enabled Ken to expand and take on what would be known as DK Fibreglass's very first official premises. We proudly to this day have on display within our main workshop the companies first ever sign that was hand gelled by Ken himself all those years ago!

Due to his determination, work ethic and clear passion for the company he dreamed of building Ken soon established DK Fibreglass as a lead supplier within the leisure and hospitality sectors, a reputation that we have kept and consistently built upon over the past 3 decades.

Ken soon turned his attentions to the commercial sector and as he did within the leisure and hospitality sector soon made DK Fibreglass a well-known and reputable supplier of GRP/FRP components to the Automotive, marine, utilities, offshore and renewable energies sectors to name but a few.

The company has gone from strength to strength in recent years with Kens grandsons stepping up into management rolls within the family company and aquirng ISO 9001:2015 certification and expanding into larger premises after winning numerous new contracts. DK continues to offer the perfect solution for those looking for an experienced and passionate GRP/FRP component specialist.

SERVICES INTRODUCTION

With over 3 decades of specialising within the GRP/FRP component manufacturing industry and working to strict ISO 9001:2015 standards our highly skilled and dedicated team of technicians here at DK are able to undertake the production of all GRP components providing our customers with a comprehensive service on all projects from producing patterns and component material specifications through to the assembly and fitting stages our expertise is at your disposal throughout the entirety of a project followed by equally dedicated after sales advice.

OUR KEY VALUES

- DEPENDABILITY
- COMMUNICATION
- INNOVATION
- CREATIVITY
- QUALITY
- ACCOUNTABILITY

MARINE SECTOR

With numerous long-standing customers within the marine sector, DK has a rich and long-standing history producing all manner of marine related components for some of the largest companies in the industry today. Such as bow thruster housing units for luxury yachts, control consoles and seating consoles, radar beacon units we are truly able to produce all manner of marine related components that you may require and to a quality that we believe to be second to none. Through to a completely new boat-build here at DK our team of skilled technicians have carried out numerous contracts building boats such as river cruisers and rib boats.

AUTOMOTIVE SECTOR

Due to its versatility and light weight GRP is a preferred material within the automotive industry so it will come as no surprise that here at DK we have a vast amount of experience within the commercial vehicles industry not only do we supply our own customers direct we also carry out sub-contracts for one of the UK's market leading truck aerodynamics specialists. Components we produce range from wheel arches kits for both single and double axel trucks as well as day cab and collar sets to side skirts and rear light panels plus numerous other components.

OFFSHORE SECTOR

We work with several companies within the offshore industry due to the unique properties of GRP such as being water-resistant and generally weather resistant all round combined with the advantage of being able to produce components with fire retardant ratings this makes GRP the perfect solution for both withstanding the harsh conditions found in and around the North sea plus helping to ensure the very highest of safety is achieved, here at DK we produce Numerous components such as LSA display frames in varies sizes, T-card cabinets through to life raft pods among other components.

RENEWABLE ENERGY SECTOR

With renewable energy set to play such a crucial part within the energy sectors future from Solar and wind farms to hydropower here at DK we are assisting our customers in leading the way from large production runs of acid resistant battery housing units with ventilation systems destined for solar farms in such places as Saudi Arabia through to control console GRP housing canopies among numerous other components. Of course, we understand that once these sites are operational this is really only the beginning as they require continual upkeep, maintenance and as natural progression within the sector advances upgrades require implementation this is why here at DK we offer our customers a fully comprehensive maintenance service as well as undertaking the production of small quantity runs.

UTILITIES SECTOR

Here at DK we have worked with several companies within the utilities industry such as Anglian water, Essex and Suffolk water we are able to undertake all manner of work from being contracted in to carry out important maintenance work to sewage plants, new watertight tanks through to the maintenance of BT fibre cabinets that we have been contracted for a number of years now to carry out routine repairs on. We are even able to manufacture brand new single and double door fire rated kiosk units as can be found housing electrical meters.

MOBILITY SECTOR

Here at DK we are proud to be the main supplier to the UK's leading mobility specialists in which we manufacture their cabin car GRP body components including the main cabin section that houses the driver through to the double skinned doors and internals all GRP components are built by our skilled team of GRP technicians here in our purposely setup facilities from pattern and mould work through to the finished units ready for dispatch.

OUR CUSTOMERS

**NORTH STAR
SHIPPING**

CUSTOMER TESTIMONIALS

'Northstar Shipping are a major player in the offshore shipping, supply & standby industry operating from various worldwide locations, here in Lowestoft we operate 25 purpose built multi-role vessels for the North Sea gas rigs, each ship has up to 3 dedicated rescue boats that are in constant demand, these boats have to be maintained to the highest standard & ready to use at any given time during the day or night 365 days a year. Often damage is sustained when launching or being recovered to the mother vessel in the challenging sea states found in the Southern Sector of the North Sea, we have to be safe in the knowledge that any repairs carried out are done to the manufacturers standards in an efficient & professional manner, that is why we choose to contract DK Fibreglass to undertake these repairs. Their years of knowledge in both fibreglass boat repair & construction was the key point when we appointed them as our main agent repairer, over the years of trading with them it has become apparent the passion that Ross, Ken & their team have to build on success, they always deliver on time which is critical to our business. From one off bespoke designs, moulding & production to everyday items we have been extremely satisfied at the quality & value given by DK's.'

Peter Mantripp
Manager
Boston Putford Offshore Safety Ltd

"Cefas have had excellent service and after-sales service from DK Fibreglass for more than 20 years. We've entrusted them with the moulds for our SmartBuoy Toroidal Floats and have never had any faults with their finished product. They have always endured to meet our demands at very short notice and delivered their product to the same excellent standards."
